

Project Title	Analyzing Swiggy : Bangalore delivery outlet data
Technologies	Business Intelligence
Domain	Food industry
Project Difficulties level	Advanced

Problem Statement:

The online food ordering market includes foods prepared by restaurants, prepared by independent people, and groceries being ordered online and then picked up or delivered. The first online food ordering service, World Wide Waiter (now known as Waiter.com), was founded in 1995. Online food ordering is the process of ordering food from a website or other application. The product can be either ready-to-eat food or food that has not been specially prepared for direction consumption.

Do ETL : Extract-Transform-Load the dataset and find for me some information from this large data. This is form of data mining.

What all information can be achieved by mining this data, would be explained in class by the trainer

Find key metrics and factors and show the meaningful relationships between attributes.

Do your own research and come up with your findings.

Dataset:

You can find the dataset on the given link

[Dataset_link](#)

Approaches:

Python, R, Tableau, Power BI, Alteryx or you can use any tools and techniques as per your convenience. We would appreciate your valid imagination in finding solutions

Project Evaluation metrics:

Code: As per the requirements

You are supposed to write a code in a modular fashion

Safe: It can be used without causing harm.

Testable: It can be tested at the code level.

Maintainable: It can be maintained, even as your codebase grows.

Portable: It works the same in every environment (operating system)

You have to maintain your code on GitHub.

You have to keep your GitHub repo public so that anyone can check your code.

Proper readme file you have to maintain for any project development.

You should include basic workflow and execution of the entire project in the readme file on GitHub

Follow the coding standards: <https://www.python.org/dev/peps/pep-0008/>

Submission requirements:

High-level Document:

You have to create a high-level document design for your project. You can reference the HLD form below the link.

Demo link:

[HLD Document Link](#)

Low-level document:

You have to create a Low-level document design for your project; you can refer to the LLD from the below link.

Demo link:

[Low Level Design Sample document link](#)

Architecture:

You have to create an Architecture document design for your project; you can refer to the Architecture from the below link.

Demo Link:

[Architecture Document Link](#)

Wireframe:

You have to create a Wireframe document design for your project; refer to the Wireframe from the below link.

Demo link

[Wire-frame link](#)

Project work:

You will have to share the Tableau Public Link of your work

You have to submit your code GitHub repo in your dashboard when the final submission of your project.

Demo link

[Project code sample link :](#)

Detail project report:

You have to create a detailed project report and submit that document as per the given sample.

Demo link

[DPR sample link](#)

Project demo video:

You have to record a project demo video for at least 5 Minutes and submit that link as per the given demo.

Demo link

[Project sample link :](#)

The project LinkedIn a post:

You have to post your project detail on LinkedIn and submit that post link in your dashboard in your respective field.
